(54) Title: SYSTEM FOR ENABLING USERS TO CREATE TASKS

(57) Abstract: There is disclosed a system for enabling a user to create at least one task. The system comprises a host server (300) for hosting task pages once they have been created, at least one user computer (302) running a browser program operable by at least one user to access task pages hosted by said host server that said at least one user has permission to access, and a task creator configured to create a task record in response to a command from an initiating user, the task record including a task universal resource indicator (uri) for each new task whereby said host server can create a task page from said task record that can be accessed using said task uri.
